

The Florida District's **CHURCH PLANTING EXTREME TRAINING**

A call to Church Planting is one of the most radical and extreme callings that a man or a woman could ever receive. It is a calling to start a brand new congregation of people who are seeking after Jesus Christ and working to be his redemptive agents in their community. It is not a task to be taken on lightly.

Nobody who desires to do something extreme with their lives does so recklessly. If you are going to climb mountains, ride waves, or dive out of an airplane, you would want to have an idea what you were in for first. Not only that, but you would want some training to know how to handle such an extreme situation.

The Florida District has worked hard to put together a quality boot camp where a Sponsoring Agency can send a potential church planter to receive the type of knowledge and training they will need to help them succeed at the exciting and challenging call to plant a church.

Want to Know More?

If you are a Sponsoring Agency that would like to have more information about how to get potential planters involved in a Church Planting Extreme Training boot camp hosted by the Florida District of the Wesleyan Church, or if you would like to get information on specific training boot camp dates, contact us through one of the methods listed below.

THE **wesleyan** CHURCH

Church Planting Extreme Training.

THE FLORIDA DISTRICT WILL TRAIN POTENTIAL CHURCH PLANTERS TO KNOW WHAT IT TAKES TO ACTUALLY START A NEW CHURCH.

Many Sponsoring Agencies have a desire to see new church works started within their target area. They may already have a qualified and assessed leader ready to “jump in” and get started. But just because a leader has a calling to plant, and has the backing of a sponsoring agency, does not mean that they are fully equipped and ready. Church Planting Extreme Training will help to encourage and equip a potential planter to know exactly what is involved in planting a church. It will give practical steps to help potential church planters know what to do as they prepare to follow God’s dream for their lives and plant a church.

It is the Florida District of the Wesleyan Church’s goal to be able to partner with these Sponsoring Agencies to help potential church planters get the practical training they need to be able to be successful at the task that lies before them. We have worked hard to develop a highly informative training format for the church planting boot camp which seeks to share as much practical information as possible in a manner that is neither overly time-consuming nor overly expensive. These training boot camps will leave potential planters feeling informed and equipped for the work God has called them to.

Q How long do Church Planting Extreme Training boot camps last?

A Our goal is to get participants the most information possible in the shortest amount of time possible. With that goal in mind, the boot camp typically lasts for three full days of intensive training.

Q What is the format of the Church Planting Extreme Training boot camp?

A The training is broken up into four modules which discuss the Health and Fitness of the Planter, what is required during the stages of Offsite Preparation, Onsite Preparation, and at Launch and Beyond.

Q What costs are involved for Sponsoring Agency to send a potential planter to an Extreme Training boot camp?

A Sponsoring Agencies are asked to cover the costs of a participant’s travel to and from the event, as well as food and lodging during the event. The cost of Event Registration is \$500 per church planting couple.

Q What other benefits are there for a Sponsoring Agency sending a potential planter to Extreme Training?

A A planter will return from the boot camp, not only with the tools to plant a church, but also with DNA and a heart that beats to continue the multiplication process after their particular plant has been launched.
